English (professional working proficiency)

JOSÉ QUEIRÓS

Software Engineer | TypeScript, AI & Customer Delivery

PROFILE

Software engineer with 8+ years of experience, working in TypeScript and Angular since v2 and through v19, and a Certified Mid-Level Angular Developer. Currently a consultant at Findmore, managing a 40-micro-frontend (MFE) Module Federation repository and carrying out Angular upgrades and the Signals migration across all of them. Previously led a legacy migration onto Angular 7 and mentored 3 junior developers. Self-started and built the OpenAI-connected microservice behind Valispace’s AI assistant, which contributed to the company’s acquisition. Daily user of Claude Code for agentic coding. MSc in Data Science.

WORK EXPERIENCE

**Frontend Developer | Findmore Consulting, S.A.** Nov 2024 - Present

- Consultant on a digital entertainment platform: implementing its UI/UX design system and delivering new features in Angular 17+
- Manage a 40 micro frontend (MFE) Module Federation repository, carrying out Angular upgrades and the Signals migration across all of them

**Technologies:** Angular 17+, Signals, Module Federation, Jest, GitLab

**Frontend Developer | Valispace** Jul 2020 - Oct 2024

- Self-started and built the OpenAI-connected microservice (Python, Django, Langchain) behind the product’s AI assistant; contributed to the company’s acquisition
- Developed the Angular frontend of requirements management software used at Airbus, BMW, Volkswagen and Volta Trucks, including performance optimisation of Angular 17 applications
- Created a reusable component library that standardised development across multiple applications
- Introduced an end-to-end testing framework, improving quality and release confidence; contributed to UX/UI decisions with cross-functional teams

**Technologies:** Angular 9+, Django, Python, OpenAI, Langchain, Postgres

**Fullstack Developer | Omnibees** Sep 2017 - Mar 2020

- Delivered a hotel management and distribution platform with a team in Brazil
- Coordinated and mentored a team of 3 junior developers; ran code reviews and enforced best practices
- Led the migration of a legacy project onto Angular 7

**Technologies:** Angular 2+, TypeScript, C#, .NET, REST API, MySQL
